

Quick How-To:

How to Review App Permissions

Who is this for?

This guide is for anyone wanting to learn how to give apps permission to access specific information or functions — like your camera, microphone, or location.

Step-by-Step Instructions

Step 1: Open Settings on Your Phone or Tablet

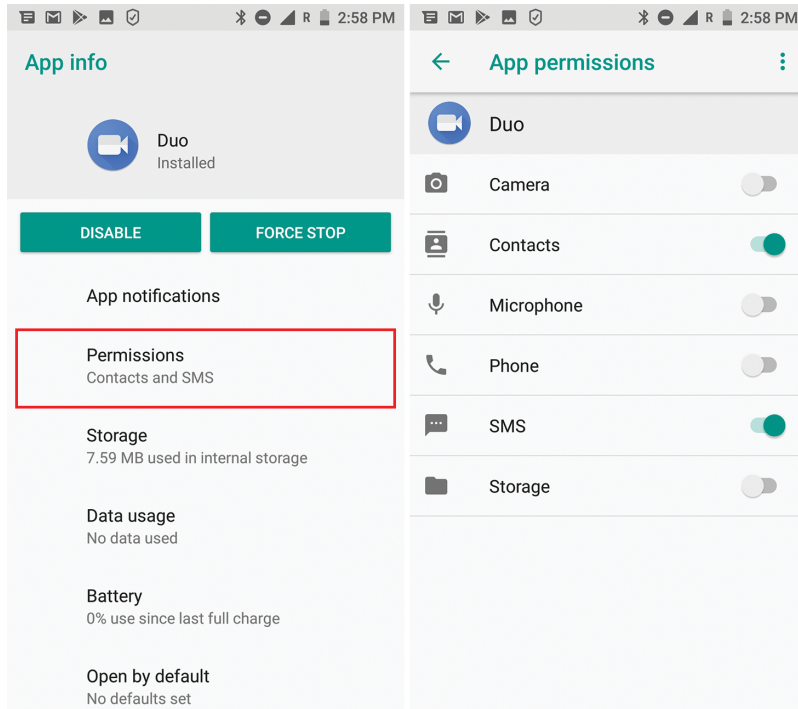

- On Android, tap **Settings > Apps**.
- On iPhone, tap **Settings**, then scroll to the app.

Step 2: Choose the App You Want to Check

- Tap on the app to open its settings.
- Look for options like **Permissions** or **Privacy**.

Step 3: Turn Off Unneeded Access

- You'll see things like **Camera**, **Location**, or **Microphone**.
- Turn off what the app doesn't need.
For example, a calculator doesn't need your microphone.

Step 4: Repeat for Other Apps

- Go back and check other apps one by one to make sure your privacy is protected.

You Did It!

You are now in control of how much information and what functions an app can access. Keeping your information and privacy secure on your device.
