

Quick How-To: Know When Your Device Needs an Update

Who is this for?

This guide is for anyone who wants to know how to find out if their phone, tablet, or computer needs a software update , helping to keep there device running safely and smoothly.

Step-by-Step Instructions

Step 1: Go to Settings

- Open your phone or computer settings.
- Look for a section called 'Software Update,' 'System,' or 'General.'

Step 2: Check for Updates

- Tap 'Check for updates' or 'Software Update.'
- Your device will tell you if it's up to date or needs to install something.

Step 3: Install the Update (if needed)

- If an update is available, follow the steps to install it.
- Plug in your device and make sure it has Wi-Fi.

Step 4: Restart After Updating

- Your device may restart automatically.
- This is normal and helps the update finish.

You Did It!

You've checked for updates and helped to keep your device secure and running well.
